DHAIRYA SHRIVASTAVA

B.Tech Computer Science Student | Python & Web Development

Raipur, Chhattisgarh, India • 9584093561 • dhairya8.shrivastava@gmail.com
GitHub • LinkedIn

PROFESSIONAL SUMMARY

Computer Science undergraduate at BIT Raipur with hands-on experience building Python applications and responsive web projects. Developed a desktop AI assistant using Python, Tkinter and the OpenAI API, alongside browser-based tools and interface recreations. Interested in software development, cybersecurity and building practical technology solutions.

TECHNICAL SKILLS

Programming	Python, C, PHP; foundational knowledge of Java
Web Development	HTML5, CSS3, JavaScript, responsive web design
Databases	MySQL, SQL, database concepts
Tools & Platforms	Visual Studio Code, GitHub, Lovable
Other Knowledge	Cybersecurity fundamentals; introductory AI and Machine Learning

EDUCATION

B.Tech in Computer Science
BIT Raipur, Raipur, Chhattisgarh • Currently in 2nd Year, 3rd Semester

Semester 1 SGPA: 7.43
Semester 2 SGPA: 7.26

SELECTED PROJECTS

AEGIS — Personal AI Desktop Assistant
Python • Tkinter • OpenAI API

- Built a Python desktop assistant with a Tkinter graphical interface and an OpenAI-powered conversational brain.
- Implemented voice interaction and natural-language assistance for answering questions and retrieving information.
- Added desktop actions including locating files, setting timers, opening websites and applications, and closing applications.

Rent Flow — Rent Tracking & Expense Management
Lovable (AI-assisted development)

- Built a web application for recording rental income and managing shared expenses.
- Includes editable expense splits, expense deductions, charts and filtered transaction history; data is stored locally.

Live: rent-split.lovable.app

Image Compressor
HTML5 • CSS3 • JavaScript

- Created a browser-based image compression tool with a straightforward user interface.

ADDITIONAL PROJECTS

Pomodoro Timer
HTML5 • CSS3 • JavaScript
- Built a browser-based focus timer to support structured work and break sessions.

Amazon Navbar Recreation
HTML5 • CSS3
- Recreated an Amazon-style navigation bar, practising page structure, alignment, spacing and visual styling.

Personal Portfolio Website
Web Development • Portfolio project
- Built and deployed a personal portfolio website to present projects, skills and professional information.

HACKATHONS & ACTIVITIES

Smart India Hackathon (SIH)
College-level selection
- Selected through the college-level selection process for participation in Smart India Hackathon.

GITAM Hackathon — Sur Raksha
AI Voice Detection • Presentation and video submitted
- Proposed a solution focused on identifying AI-generated voices and addressing voice-based scams.
- Submitted the project presentation and supporting video; selection results are pending.

CERTIFICATIONS & WORKSHOPS

• Cybersecurity	Step2Skill
• Web Development	Simplilearn
• Python Programming	Simplilearn
• Python Workshop	College workshop
• Cybercrime & Cyber Awareness	NIIT Foundation
• Java, AI & Machine Learning	IBM SkillsBuild
